Recycled plastic fence slat black

Data sheet

Contains:

-Polyethylene-Polypropylene-PET-HDPE -UV stabilizer- No Coloring agent is added **The mixing ratios are always the same for consistent quality**

Work with solid recycled plastic:

Recycled plastic fence slats can be fixed to any sub surface with bolts or wood screws. Pilot hole is recommended with 2-4mm room around the screw. Can be drilled, and cut like wood, HSS drill bit and metal/wood sawblade is recommended. Eye protector is recommended at cutting.

Essential characteristics:

-Size:20x80mm in different lengths-Raw material:Recycled mixed thermoplastics

-Density (average) 0.987±0.010 g/cm3 MSZ EN ISO 1183-1:2019 (Method "A")

- Relative dimensional change in the longitudinal direction due to heat (average value) (70 °C, 1 hour) +0.008% / m MSZ EN 479:2018 Weather resistance: (UV resistance), 1000 hours of exposure -no change is visible, MSZ EN 513:2018

Aging due to heat (80 °C, 50 days) -no change is visible, EAD 030350-00-0402 2.2.10 MSZ EN ISO 178:2019

Dimensional accuracy - side width - relative curvature

+1 / -1 mm MSZ EN 12839:2012

Moisture absorption (ISO 175) < 0.2 wt%

-100% Recyclable -Does not freeze or crack -Does not leach any chemicals into the environment during its lifespan -Melting starts at 180° C

Results of tensile strength test Screw-Screw size:4x50 mm-Drag speed:10 mm/min (not pre-drilled holes)-Average pulling force:2595 N +/-6% variance
